WATER INNOVATION SUMMIT

About the Summit

The Summit will bring together business leaders, government officials, and water experts to discuss practices in corporate water stewardship and public policies to address the ever growing global demand for water.

Objectives

- Showcase best practices and case studies in corporate water stewardship.
- Establish water sustainability as an enabler of economic growth.
- Promote a business case for water and engage the business community on water issues.
- Advance policy ideas, public-private partnerships, and industry solutions to manage water resources.
- Strengthen U.S. collaboration with Israel on water policy and innovative technology solutions.

Participants

- Business leaders, investors, policy experts and global water innovators.
- State and metropolitan Chambers of Commerce.
- Federal, state, and local government officials, state development agencies and utility authorities.
- Academia and research institutions.
- Government of Israel, government ministers and water experts

Areas of Focus

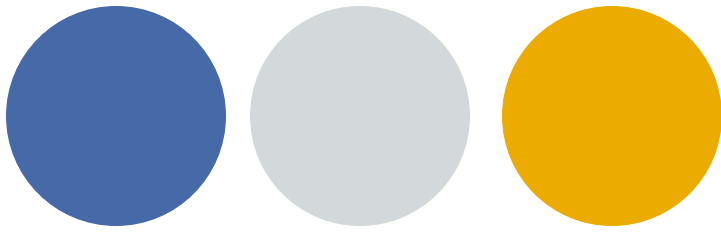

- Improving water governance to promote industrial & economic growth: Discussing public policy, innovative advancements and regulatory challenges for industry.
- Water stewardship in corporate strategy: Promoting good water principles across the corporate supply chain, including understanding and addressing risks.
- Public-private partnerships: Supporting models for cooperation on water management solutions.
- Promoting investment in water: From water infrastructure to technologies that drive innovation in water resource management.
